

Biologique Recherche Remodeling Face®

The Remodeling Face[®] machine uses state of the art bio-electrotherapy for a tailored beauty treatment that combines two types of electric current and one radiofrequency wave in order to provide a more clearly defined facial contour. Results are prolonged and reinforced with repeated treatments (recommended in a series), and results are even more long-lasting if the client maintains a healthy lifestyle and follows recommended at-home care with customized product regimen.

Benefits include:

- Face, neck and decollete are remodeled with visible action on texture and volume from the first session
- Improved quality of the epidermis and increased muscle tone, with an immediate and lasting lifting effect
- Reduced bags under the eyes and toned eyelids, making eyes look wider
- Helps postpone plastic surgery, which is why we love to call it a 'non-surgical face lift'
- Helps prepare skin tissue for cosmetic surgery and enhances the quality of postoperative results
- Lymphatic drainage

Electric Currents

Remodeling Face® emits two types of electric currents and one radio frequency wave:

Galvanic Current

Cleans and purifies the epidermis by stimulating the saponification of fatty acids contained in the sebum (descaling– unclog pores); promotes the bioavailability of ionizable agents (ionization– penetrates product deeper); changes the diameter of small blood vessels to stimulate microcirculation; allows for better skin oxygenation for radiance and glow.

Medium Frequency Current (modulated at low frequency)

Stimulates muscle tone in the face; benefits are cumulative with each treatment – think of it like a workout for the face!

High Frequency Radio Electric Current

Energizing phase of treatment which helps achieve optimal regeneration.

Available as a booster during your 90+ minute BR Hyper-Customized Facial:

Choose Remodeling Face[®] and/or Chin Strap* \$285 one session; \$1,610 series of 6 (~\$268 per facial)

*The chin strap enables lifting the skin jowls and restructuring the specific area of the lower cheeks, the oval of the face and neck.

Recommended in a series of 6 sessions, 1-2 weeks apart, for best results.
